01. CREATE ENCRYPTED RAFT

The Digital Life Raft system enables you to:

1. Encrypt your secrets using a secure, multi-raft master passphrase.
2. Generate three trusted heir passphrases – any two can unlock your secrets.
3. Store and distribute your encrypted secrets and passphrases to meet your needs. Choose one or more options:
 - a. Distribute files or paper prints to heirs or secure locations
 - b. Memorize your master passphrase
 - c. Store encrypted secrets securely online (small fee required)
 - d. Set up an inactivity-triggered release of one heir passphrase
4. Access and update your secrets anytime – decrypt, edit, and re-encrypt as needed.

HEIR RECOVERY (RESTORE VIA THE NETWORK)

To retrieve the raft if the owner's check-in timer has run out, enter these details to download the encrypted network share and combine it with your physical card phrase:

RAFT PUBLIC ID

The unique raft-specific public ID printed on your physical card. This tells the application how to locate the Dead Man's Switch (DMS) on-chain.

E6sLXBqURPEfLWodwo11Ph6pQnASDChFSvcxNYeFzo86

NETWORK GATEWAY URL

The gateway used to locate the raft on the network. Use the default RaftCo Relay or enter the custom Sovereign Gateway URL provided by the owner.
